

How to replace the rear brake disc on BMW 3 E90

Carry out replacement in the following order:

Replace the brake disks on the car BMW 3 E90 in complete set for each axis. Regardless of the state of components. This will ensure even braking.

1

Fully lower the parking brake lever.

2

Place wedge blocks under the front wheels.

3

Loosen the wheel mounting bolts.

4

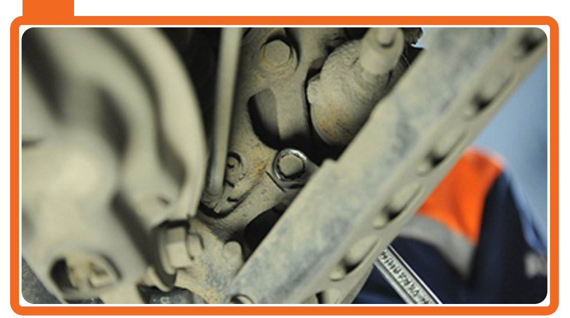

Raise the rear of the car and secure on supports.

5

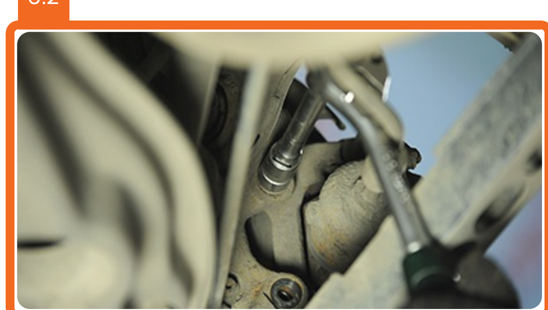

Remove the rear wheels.

6.1

6.2

Unscrew the brake caliper fastening

7

Remove the brake caliper.

AutoDoc recommends:

Tie the caliper to the suspension or to the body with a wire without disconnecting from the brake hose to prevent depressurization of the brake system.

9.1

9.2

Unscrew the brake disc mounting bolts and remove it.

AutoDoc recommends:

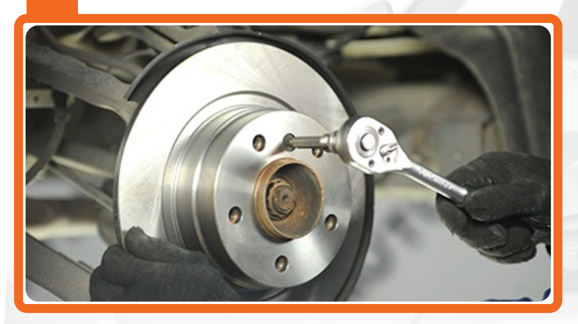

Clean the hub and apply high temperature grease to the seating surface of the disc.

10.1

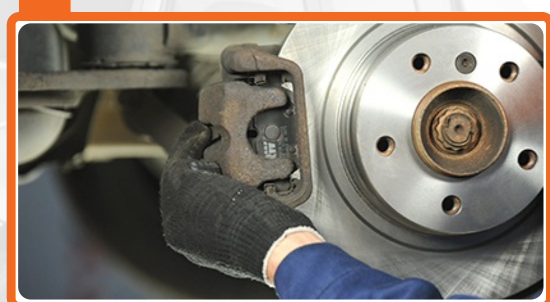

Install the new brake disc on the hub and tighten the screws.

10.2

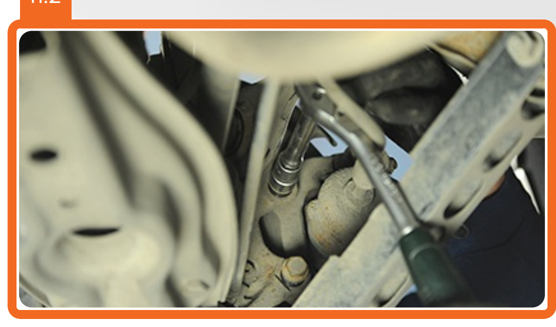

11.1

Install the brake caliper and fix it.

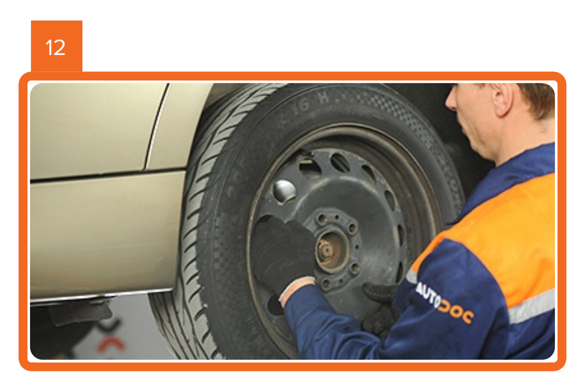

11.2

11.3

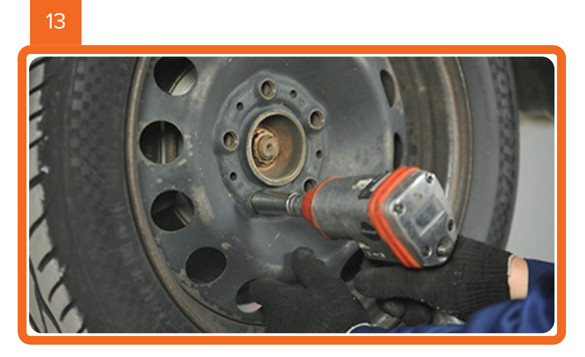

12

Install the wheel.

13

Lower the car and working in a cross order, tighten the wheel bolts.

Check the brake fluid level in the expansion tank and refill if necessary.

With the BMW 3 E90 engine off, pump the brake pedal several times until you feel considerable resistance

Perform test braking when driving at an average speed, the BMW 3 E90 should not pull to one side.
